

September 19, 2023

Dear Ms. Bosley,

The West Virginia University's Office of the Provost has performed a review of the University Testing Center. The review was informed by a self-study provided by the unit, a stakeholder survey, and institutional data on budget and staffing. Accompanying this recommendation are two additional files: the unedited comments provided through the stakeholder survey and a summary of those comments.

The recommendation for the unit is:

- **Continuance at the current level of activity**
- Continuance at the current level of activity with specific action
- Continuance at a reduced level of activity
- Identification of the unit for further development
- Development of a cooperative unit
- Discontinuance

The key findings of the review that led to this recommendation are:

- 1) The unit is productive and efficient.
- 2) The unit delivers a key aspect of the institutional mission.
- 3) The unit's activity has directly contributed to a reduction in the number of academic integrity violations since it began operations.
- 4) Access to the testing center is in high demand and it operates at full or near-to-full capacity.

The unit's leader should notify the staff within this unit of the Provost's Office recommendation by forwarding this email and attachments immediately upon receipt.

No actions are required of the unit.

Sincerely,

WVU Office of the Provost
